AB - SU1240038 A steroid derivative, 3-hydroxy-1,3,5-triene-17-hydrazone of  
    formula (I) is new.  
    - USE - (I) is useful in medicine as it has hormonal and anti-tumour  
        activity.  
    - ADVANTAGES - (I) is a new steroid derivative of the estran (sic)  
        series having increased anti-tumour activity compared with its  
        structural analogues of similar action.  
CN - 9732-19401-N
